I left space below for them to write down any ideas or wants for a new church. Quite a few mentioned bigger better bathrooms and even toilets that work. Individual classrooms, media room, a cry room for mothers with a speaker so the mother can still hear the service. I feel these response really solidify what most of us already know..we NEED a new building. The fact that 15 young members of our church answered they would most likely remain members after graduation says it all.
